

Authors

Alan D. Ackerman

General Systems Division, Rochester, Minnesota

Mr. Ackerman is a Development Engineer and manager of the Acoustics Laboratory at the General Systems Division Laboratory in Rochester, Minnesota. He has been with IBM since 1963. His education includes a B.S. in 1961 and an M.S. in Mechanical Engineering in 1964 from the University of Minnesota. He is a member of Pi Tau Sigma, Tau Beta Pi, the Acoustical Society of America, and the American Society of Mechanical Engineers.

Gerald W. Baumann

Systems Development Division, Boulder, Colorado

Mr. Baumann is a Senior Associate Engineer in a Mechanical Analysis Group at the Systems Development Division Laboratory in Boulder. He joined IBM in 1968 after receiving a B.S. degree in Mechanical Engineering from Marquette University. He later received an M.S.M.E. degree from the University of Colorado. Most of his work has been in the area of foil air bearing design and in analysis of the influence of the bearing design on foil dynamics or motion. He is a member of the Scientific Research Society of America.

David A. Beaty

Office Products Division, Lexington, Kentucky

Dr. Beaty is a Development Engineer in the Mechanical Analysis Department of the Office Products Division's Development Laboratory in Lexington. He has been with IBM since 1963. He obtained a B.S.Ch.E. degree from Purdue University in 1952, an M.S. and a Ph.D. in Engineering Mechanics from the University of Michigan in 1959 and 1963, respectively. He worked for the Chrysler Corporation from 1952 to 1954 and from 1956 to 1958 with the intervening years being spent in the Army. He was an instructor at the University of Michigan for the 1962-1963 school year and is a member of the American Society of Mechanical Engineers.

Robert E. Bishop

Office Products Division, Lexington, Kentucky

Mr. Bishop is a Senior Associate Engineer in the Mechanical Analysis Department of the Office Products Division in Lexington. He joined IBM in 1969 after receiving a B.S.M.E. from Texas A&M University. He is currently working toward an M.S. in Engineering Mechanics at the University of Kentucky. Mr. Bishop is a member of the American Society of Mechanical Engineers, the Society of Automotive Engineers, the American Association for the Advancement of Science, Tau Beta Pi, Pi Tau Sigma, and Phi Kappa Phi.

William T. Chen

Systems Development Division, Endicott, New York

Dr. Chen is an Advisory Engineer with the Mechanical Analysis Department in the Systems Development Division Laboratory in Endicott. He graduated from Queen Mary College, University of London with a B.S. in Mechanical Engineering in 1958. He subsequently received an M.S. in 1962 from Brown University and a Ph.D. in 1965 from Cornell University, where his major field was in solid mechanics. He joined IBM in 1963 at Endicott, where he has remained since. His work has been concerned with applied mechanics, primarily stress analysis and mathematical methods. His publications are mostly in the field of classical linear elasticity.

Francis J. Crispi

Systems Manufacturing Division, Poughkeepsie, New York

Mr. Crispi is a Methods Engineer in Power Products Test Engineering in Poughkeepsie, New York. He has been with IBM since 1956. His education includes an A.A.S. in Electronics Technology from Dutchess Community College in 1965. At present, he is in his senior year at Marist College where he is working on a B.S. in Theoretical Physics.

Dominic A. DiCicco

Components Division, Burlington, Vermont

Mr. DiCicco is a Development Engineer and a manager of a group involved in thermal analysis, mechanical analysis, reliability and design for advanced memory products at the Laboratory in Burlington. He joined IBM at the Components Division Laboratory in Poughkeepsie in 1964 to work in heat transfer and fluid flow. He transferred to Burlington in 1968 as manager of Heat Transfer Development. He received the B.M.E. degree from the University of Detroit in 1961, the M.S.M.E. degree from Purdue University in 1963, and the M.S.I.A. degree from Union College in 1969. Mr. DiCicco is a member of ASME, Tau Beta Pi, Pi Tau Sigma, and Alpha Sigma Nu.

Theodore F. Flavin

Components Division, Endicott, New York

Mr. Flavin is an Advisory Engineer in the Components Division. Since he started with IBM in 1943, his experience has included development of mechanical and hydraulic devices, along with their controls. His recent work has been in structural analysis with emphasis on behavior due to vibrations.

Thomas A. Hoskins

Office Products Division, Lexington, Kentucky

Mr. Hoskins is a Senior Engineer and manager of a New Product Release Group in Copier Production Engineering at the Office Products Division in Lexington. He has been with IBM since 1962. His education includes a B.S. in Mechanical Engineering from the University of Tennessee in 1962 and he expects to receive an M.S. in Mechanical Engineering from the University of Kentucky upon completion of his thesis. While attending the University of Tennessee, Mr. Hoskins was employed for three years as a student mechanical engineer with the Southern Railway Company. He is presently an associate member of the ASME.

Francis K. King

General Systems Division, Rochester, Minnesota

Mr. King is a Senior Associate Engineer in a reliability, availability and serviceability technology group at the General Systems Division Laboratory in Rochester. He received his M.S. in Mechanical Engineering from South Dakota State University in 1968. He joined IBM in 1968 to work on projects in computer-aided mechanical design. He is a member of the ASME.

Chua Lin

Systems Development Division, San Jose, California

Mr. Lin is a Staff Engineer in the Mechanical Technology Group at the Systems Development Division Laboratory in San Jose. He joined IBM in 1966 in San Jose where he worked on the vacuum system in the electron beam recorder of the trillion-bit photodigital storage system for the Atomic Energy Commission. He is currently engaged in the development of air bearing sliders for disk files. His education includes a B.S. in 1965 and an M.S. in 1966 both in Mechanical Engineering from the University of California at Berkeley and an M.S. in Electrical Engineering from the University of Santa Clara in 1970. Mr. Lin is a member of ASME.

Robert D. Lindsted

Wichita State University, Wichita, Kansas

Mr. Lindsted is an instructor in Mechanical Engineering at Wichita State University. He received a B.S. in Mechanical Engineering from Wichita State University in 1969 and an M.S. in Mechanical Engineering from the University of Vermont in 1971. He was employed by the Proctor and Gamble Company in 1968 in the Research and Development Laboratory, where he was concerned with heat transfer processes. He joined IBM in 1969 where he worked in the field of heat transfer at the Components Division Laboratory in Burlington. Mr. Lindsted is a member of Tau Beta Pi, Pi Tau Sigma, and the American Society of Mechanical Engineers.

George C. Maling, Jr.

Systems Development Division, Poughkeepsie, New York

Dr. Maling is a Senior Physicist in the Acoustics Laboratory at the Systems Development Division Laboratory in Poughkeepsie. He has been with IBM since 1965, and was a consultant to the Laboratory from 1959 to 1965. His education includes an A.B. from Bowdoin College, and the S.B. and S.M. from M.I.T., all in 1954. He also received the Electrical Engineer and Ph.D. degrees from M.I.T. in 1958 and 1963, respectively. He worked at the Philco Corporation in 1954-1955, and was a research assistant and a staff member at M.I.T. during the period 1957 to 1965. His IBM responsibilities include noise control engineering, physical acoustics, wave propagation, and noise measurement systems. He is a Fellow of the Acoustical Society of America, and has been Chairman of its Technical Committee on Noise since 1969. He is a Senior Member of the IEEE. He has been a member of the G-AE AdCom, and is active on the G-AE Standards Committee. He is also a Registered Professional Engineer in New York.

John A. Paivanas

Components Division, East Fishkill, New York

Dr. Paivanas is an Advisory Engineer in product assurance thermal and mechanical technology at the Components Division Laboratory in East Fishkill. His academic background in-

cludes the B.S. and M.S. in Mechanical Engineering from the University of Buffalo and a Ph.D. in Engineering Mechanics from the State University of New York at Buffalo. Prior to joining IBM in 1968, he was employed by the Union Carbide Corporation from 1955 to 1968, where he was engaged in research and development in cryogenics, high vacuum technology, and aerothermodynamics. He holds a number of patents pertaining to cryogenic processes and equipment. At the University of Buffalo, he served concurrently as a Research Associate in fluid mechanics and as an instructor. Dr. Paivanas is a member of Sigma Xi, the American Society of Mechanical Engineers, the American Institute of Aeronautics and Astronautics, and the American Association for the Advancement of Science.

A. M. Patlach

Research Division, San Jose, California

Mr. Patlach is a Research Staff Member working with the Applied Technology Group at the San Jose Research Division laboratory in San Jose, California. He has been with IBM since 1958. He received his B.S.E.E. from The City College of New York in 1964. He has been involved in the design of closed-cycle cryogenic refrigerators for some years.

Roger H. Peterson

General Systems Division, Rochester, Minnesota

Mr. Peterson is a Senior Engineer and manager of Mechanical Technology at the General Systems Division Laboratory at Rochester. His education includes a B.S.E.E. degree from Michigan Technological University in 1956 and an M.S. in Mathematics from St. Mary's College in 1967. He has also done graduate work at the University of Pittsburgh. He was with Westinghouse Atomic Research before joining IBM in 1957. He is a member of Eta Kappa Nu, Tau Beta Pi, Phi Kappa Phi, Phi Eta Sigma, the Institute of Electrical and Electronic Engineers, the Acoustical Society of America, and the Instrument Society of America.

James B. Randolph

General Systems Division, Rochester, Minnesota

Mr. Randolph is a Senior Associate Engineer in the electrical technology group at the General Systems Division Laboratory in Rochester. He has been with IBM since 1968. His education includes a B.S.M.E. in 1964 from Iowa State University and an M.S.M.E. from the University of Missouri in 1968. Since joining IBM he has worked primarily on heat transfer in cooling electronics and materials processing, particularly the superplastic technology, and on packaging microelectronic and hybrid electronic systems. He is a member of the National Society of Professional Engineers.

Thomas H. Richards

Office Products Division, Lexington, Kentucky

Mr. Richards is an Advisory Engineer in the Mechanical Analysis Department of the Office Products Division's Development Laboratory in Lexington. He has been with IBM since 1965. His education includes a B.S., 1964, and an M.S., 1965, both from the University of Louisville.

Adolph W. Rzent

Systems Manufacturing Division, Poughkeepsie, New York

Mr. Rzent is an Advisory Engineer in the Advanced Manufacturing Engineering group at Poughkeepsie. His education includes a B.S.E.E. from the Indiana Institute of Technology and a series of graduate and undergraduate courses in Materials Engineering taken at RPI, under the IBM Resident Study Program. Mr. Rzent joined IBM in 1951, after doing design work for International Harvester and testing for General Electric. Mr. Rzent is a member of the American Welding Society, a member and past chairman of the Society of Manufacturing Engineers and presently the chairman of a microelectronic group in the Society of Automotive Engineers.

H. W. Simpson

Office Products Division, Lexington, Kentucky

H. W. Simpson is a Senior Engineer in the Electrophotographic Technology area of the Office Products Division Laboratory at Lexington, Kentucky. He has been with IBM since 1957. He has a B.S.E.E. and an M.S.E.E., both from University of Kentucky.

Douglas H. Strobe

Systems Development Division, Endicott, New York

Mr. Strobe is an Associate Engineer in the Electrical Reliability Technology Department at the Systems Development Division Laboratory in Endicott. He has been with IBM since 1960. His education includes an Associate degree in Electrical Technology from Broome Community College in 1960. He has worked in the field of holographic interferometry for the last five years.

Robert F. Sullivan

System Development Division, San Jose, California

Dr. Sullivan is manager of an Advanced Technology Group at the Systems Development Division Laboratory in San Jose, and is currently engaged in the development of hardware for advanced disk file storage programs. He has been with IBM since 1968. His education includes a B.S. in Mechanical Engineering from Northwestern University, 1963; an M.S. in Engineering Mechanics in 1964 and a Ph.D. in Applied Mechanics in 1969, both from Stanford University. He worked for Lockheed Missiles and Space Company from 1960 to 1963. Dr. Sullivan is a member of the Society for Experimental Stress Analysis and Pi Tau Sigma.

James W. White

Data Processing Division, Winston-Salem, North Carolina

Mr. White is presently an Assistant Marketing Representative in the Data Processing Division Branch Office in Winston-Salem, North Carolina. He received a B.S. and an M.S. degree from Clemson University in 1965 and 1968, respectively, majoring in Mechanical Engineering. He also did additional part-time study at the University of Florida, the University of Alabama and Stanford University. Mr. White was employed by Pratt-Whitney Aircraft from 1965 to 1966 as an Analytical Engineer and served as a teaching assistant at Clemson University from 1966 to 1968. He joined IBM in 1968 at Huntsville in the Federal Systems Division as a thermodynamics engineer. In 1970, he joined the Systems Development Division Laboratory in San Jose as a Staff Engineer in an Advanced Technology Group. His work in San Jose included applied mathematics and numerical analysis related to gas lubrication and heat transfer.

Alan D. Wilson

Systems Development Division, Endicott, New York

Mr. Wilson is an Advisory Engineer in the Electrical Reliability Technology Department. He obtained a B.S.E.E. from the University of Utah in 1959 and an M.S.E.E. from Cornell University in 1960 and joined IBM in the same year. Mr. Wilson has done extensive work on the reliability and other properties of light sources and detectors. Since 1966 he has been investigating holography as a useful measurement technique. Mr. Wilson is a member of the Optical Society of America.

Clement C. Wilson

Office Products Division, Lexington, Kentucky

Dr. Wilson is a Senior Engineer in the OPD Development Laboratory in the Process Technology Group. His education includes a B.S. in Mechanical Engineering and an M.S. from the University of Tennessee in 1956 and 1959, respectively, and a Ph.D. from Purdue University in 1964. He was an instructor in the Mechanical Engineering Department at the University of Tennessee during the academic years from 1956-61. During this time, he was involved in experimental stress analysis research projects. He joined IBM full-time in June 1961 after having spent the summer of 1960 at IBM while on leave from the University of Tennessee. After an educational leave at Purdue University where his research work was in vehicle dynamics, he returned full-time to IBM in February 1964, where he was Mechanical Analysis Representative for the Composer program. He was manager of the Mechanical Analysis Department from 1966 to 1971. Dr. Wilson is currently teaching a graduate course in Mechanical Engineering at the University of Kentucky. He is a member of ASME, Sigma Xi, American Society of Engineering Education, Tau Beta Pi and Pi Tau Sigma.

James C. Yarrington

Systems Development Division, Endicott, New York

Mr. Yarrington is a Project Engineer in Recognition Systems at the Systems Development Division Laboratory in Endicott, New York. He has been with IBM since 1960. In 1957, he received a B.M.E. from Syracuse University. He was a graduate assistant at Syracuse University from 1957 to 1960 and worked at General Electric in 1959.

Jack L. Zable

Systems Development Division, Endicott, New York

Dr. Zable is an Advisory Engineer in the Mechanical Technology area at the Systems Development Division Laboratory in Endicott. He joined IBM in 1964. He received the B.M.E. degree in 1963 from The City College of New York and the M.S.M.E. degree in 1965 from Purdue University. He received the Ph.D. degree in Mechanical Engineering from Purdue University in 1969, studying under an IBM Resident Study Graduate Fellowship. Since rejoining IBM in 1969, he has been involved in the dynamic analysis of mechanical systems. Dr. Zable is a member of Pi Tau Sigma and Sigma Xi.

Richard E. Zelenski

General Systems Division, Rochester, Minnesota

Mr. Zelenski is a Staff Engineer in the Mechanical Measurement Technology Department at the General Systems Division in Rochester. He joined IBM in 1966 after receiving a B.S. and an M.S. in Mechanical Engineering both from the University of Wisconsin. Mr. Zelenski is a member of Pi Tau Sigma, Tau Beta Pi, Phi Kappa Phi, and the American Society of Mechanical Engineers.

Contents of previous two issues

January 1972

Vol. 16, No. 1

• Papers:

Silicon Process Technology
for Monolithic Memory

by *R. H. Collins, E. G. Grochowski and W. D. North*. 2

Design Innovations of the IBM 3830
and 2835 Storage Control Units

by *G. R. Ahearn, Y. Dishon and R. N. Snively*. 11

Readout Performance Analysis of a
Cryogenic Magneto-optical
Data Storage System

by *B. R. Brown* 19

Theories of the Distribution of Deposit from
Sputtered Disk and Rectangular Electrodes

by *R. E. Jones, Jr.* 27

Cross-coupled Thyristor Storage Cell

by *W. Jutzi and C. H. Schuenemann* 35

Efficient Evaluation of Array
Subscripts of Arrays

by *A. Hassitt and E. Lyon* 45

Experiments on Page Size, Program Access
Patterns, and Virtual Memory Performance

by *D. J. Hatfield* 58

• Communications:

Sputter-etching of Heterogeneous Surfaces

by *L. I. Maissel, C. L. Standley and L. V. Gregor*. 67

Ge Epitaxial Refill Deposition Techniques for
Fabricating Pedestal Transistor Structures

by *V. J. Silvestri, T. B. Light, H. N. Yu
and A. Reisman* 71

Preface: Environmental Science 90

● *Papers on environmental topics:*

Model for Time-dependent Raindrop Size Distributions; Application to the Washout of Airborne Contaminants

by F. F. Abraham, S. K. Jordan,
R. N. Kortzeborn and H. G. Kolsky 91

Rationale, Limitations, and Assumptions of a Northeastern Forest Growth Simulator

by D. B. Botkin, J. F. Janak and J. R. Wallis 101

Subsurface Hydrology at Waste Disposal Sites

by R. A. Freeze 117

Estimate of Subsidence in Venice Using a One-dimensional Model of the Subsoil

by G. Gambolati 130

Nonsupervised Crop Classification

through Airborne Multispectral Observations

by G. Nagy and J. Tolaba 138

Interactive Computer-based Game for Decision-making in Ecology

by T. I. Peterson and P. N. Wahi 154

Air Quality Diffusion Model; Application to New York City

by L. J. Shieh, P. K. Halpern, B. A. Clemens,
H. H. Wang and F. F. Abraham 162

Numerical Investigation of the Atmospheric Dispersion of Stack Effluents

by C.-C. Shir 171

Appendix

by W. E. Langlois 178

Overlap Emissivity of CO₂ and H₂O in the 15- μ m Spectral Region

by N. Braslau 180

● *Communication:*

A Model of Charge Transfer in Bucket Brigade and Charge-coupled Devices

by L. G. Heller, W. H. Chang and A. W. Lo 184

IBM

The IBM Journal of Research and Development is regularly indexed and abstracted by Science Abstracts (I.E.E.-Britain), Chemical Abstracts, The Engineering Index, Physikalische Berichte, Metals Abstracts, Mathematical Reviews, Computing Reviews, Computer Abstracts (Technical Information Company, Ltd.-Britain), Bulletin Signaletique (C.N.R.S.-France), Academy of Sciences of the USSR Institute of Scientific Information, Instrument Abstracts (British Scientific Instrument Research Association), Automatic Subject Citation Alert, Documentation Abstracts, Applied Mechanics Reviews and Data Processing Digest. Reproductions of the Journal by years are available on positive microfilm from University Microfilms, 313 North First Street, Ann Arbor, Michigan 48103.
